ASIA'S PREMIER OFFSHORE ENERGY EVENT SET TO SHAPE THE INDUSTRY FUTURE

SINGAPORE, 1 NOVEMBER 2022 – OSEA (Offshore Southeast Asia), the largest offshore energy event in Asia will take place on **15 to 17 November in Marina Bay Sands Singapore**, with 12,000 attendees from over 60 nations and regions for three days. It will outline the energy sector's key challenges and opportunities and showcase the technology that will influence the future of the oil & gas, as well as renewables industries as the energy transition accelerates (see *Annex A: OSEA 2022 Conference Day Themes and Agenda*).

Ms Low Yen Ling, Minister of State, Ministry of Culture, Community and Youth & Ministry of Trade and Industry will officiate the Opening Ceremony on 15 November. Delegates will join to discuss how the changing energy security landscape will affect the balance of offshore investment between oil & gas and renewable energy; the role of government policy in supporting decarbonisation in the oil & gas industry; opportunities for learning between oil & gas and renewables; and how digital technologies can be harnessed to decarbonise the sector.

Speaking about the upcoming event, Professor Chan Eng Soon, Chairman of the OSEA Steering Committee and CEO of Technology Centre for Offshore & Marine, Singapore (TCOMS) said, "This year's conference and tradeshow come at an opportune time as our region reopens after the pandemic, and the sector focuses on the coming energy transition. We look forward to debates around the transition, offshore renewables, and in particular, progress on technology, digitalisation, and operational practices that will help the offshore energy industry move towards sustainability." (see *Annex B: OSEA 2022 Steering Committee*)

The OSEA exhibition and conference is an important meeting point for Asia's offshore industry. It will bring together executives across the innovation chain, from innovators and start-ups to incubators and accelerators at TechX@OSEA. In an era where the oil & gas industry is exploring strategies for delivering the industry's net-zero ambitions, OSEA will be hosting a Talent & Skills Development Pavilion to showcase near and longer-term job prospects.

It is beyond doubt that the oil & gas industry needs to adopt technologies such as electrification and carbon capture in order to develop as a net-zero industry. Central to this is the industry's ability to ensure it can continue to supply essential products for industrial uses.

Visitors to the event will be able to experience and evaluate the products and solutions that will help

the sector realise this transition. Through by-invite high-level networking sessions at OSEA Executive Networking Sessions, senior executives will be able to initiate dialogue and network with Asia's most important energy decision makers.

Commenting on the opportunities for attendees, **Sukumar Verma, Managing Director, Maritime & Energy for Informa Markets**, said, "OSEA offers a unique marketplace for knowledge and networking for the offshore energy industry, this is a one stop shop for visitors, where they can meet new clients, grow their business and expand their solutions to cater to new opportunities in offshore renewables, digitalisation and decarbonisation."

Notes to Editors:

Comments from our speakers

Alban d'Hautefeuille, Managing Director Gas Renewables & Power / Offshore Wind Asia at TotalEnergies (Keynote: *The Energy Market Reorder*, Tuesday 15th Nov, 9.30).

"The energy transition will demand that our industry transforms energy production, while continuing to meet the energy needs of the planet. At TotalEnergies, our ambition to be Net Zero by 2050 means developing an integrated approach to decarbonise operations and energy production. We will rebalance our production mix towards LNG as a transition fuel, and a target of building a gross capacity of 100 GW of renewable energy by 2030. Asia is at the heart of innovation in the energy sector, and we are excited to be part of the discussion at OSEA 2022 and see the ideas and new technologies the event brings together."

Narsingh Chaudhary, EVP & Managing Director Asia Pacific at Black & Veatch (Panel: *The CCS Opportunity, Transitioning to Negative Carbon Emissions*, Tuesday, 15th Nov, 13:45)

"At Black & Veatch, we know that organisations in Asia are looking to transformative technologies such as carbon capture, utilisation and storage and sustainable fuels including ammonia and green hydrogen to help achieve the aggressive goals businesses have set themselves on decarbonisation. OSEA 2022 brings together great ideas, technologies, and people to demonstrate how operators in energy and heavy industry can achieve these goals. We are excited to discuss these ideas with our peers at the conference in Singapore."

Dr Sanjay C Kuttan, CTO at the Global Centre for Maritime Decarbonisation (Panel: *Collaboration Opportunities between Oil & Gas and Offshore Renewables*, Wednesday 16th Nov, 11:45).

"OSEA 2022 creates a space for experts from across the offshore energy industry to meet and share insight and experience and support faster deployment of low carbon technologies. We are excited by joining our industry colleagues in Singapore in November to discuss how oil and gas can leverage its skills, assets and infrastructure to support the development of the offshore renewable energy sector in Southeast Asia."

Ang Joo Hock, Assistant Vice President (R&D) at Sembcorp Marine (Panel: *3D Printing and Additive Manufacturing for Offshore Oil & Gas Operations*, Thursday 17th Nov, 13:15)

"At Sembcorp Marine, we believe that green innovation will play a pivotal role in making the global energy transition a success, by tackling waste and inefficiency along the value chain to make oil and gas projects more carbon efficient or neutral. Additive manufacturing offers one viable solution to this challenge. We look forward to participating in OSEA 2022 to share our knowledge and address how the industry can innovate to deliver an effective energy transition."

About Informa Markets

OSEA is organised by Informa Markets, a division of Informa plc. Informa Markets creates platforms for industries and specialist markets to trade, innovate and grow. We provide marketplace participants around the globe with opportunities to engage, experience and do business through face-to-face exhibitions, targeted digital services and actionable data solutions. We connect buyers and sellers across more than a dozen global verticals, including Pharmaceuticals, Food, Medical Technology and Infrastructure. As the world's leading market-making company, we bring a diverse range of specialist markets to life, unlocking opportunities and helping them to thrive 365 days of the year. For more information, please visit www.informamarkets.com.
